Umer Mukhtar

AI Solutions Consultant & Product Strategist | Building Production
AI Systems for Saudi Businesses | Voice AI, Automation, Growth
Strategy | Gen AI Bootcamp Graduate | Open to Consulting & Full-
Time AI PM/Strategy Roles
Riyadh, Saudi Arabia

Summary

I'm an AI Solutions Consultant and Product Strategist specializing in building production AI systems for Saudi businesses. My work sits at the intersection of strategy, execution, and measurable business impact. What I Do: I partner with Saudi businesses to architect and deploy AI-powered solutions that fundamentally change how they operate. From voice AI receptionists handling thousands of customer calls, to automation pipelines generating 15 pieces of content weekly, to Meta ad campaigns projecting 180% ROI—I translate AI capabilities into concrete business value. My Edge: 15 years of IT infrastructure leadership + hands-on mastery of production AI tools (Claude Code, n8n, Lovable, Vapi AI) + completed Gen AI bootcamp + track record of deployed client solutions. I don't just consult—I build, deploy, and measure.

Current Work:

- Building AI solutions for Saudi e-commerce, healthcare, and service businesses
- Designing scalable automation pipelines using Claude Code + n8n
- Deploying Voice AI systems (Arabic-native) for customer engagement
- Creating AI-powered growth strategies combining automation, content, and paid campaigns
- Completing Gen AI bootcamp—mastering prompt engineering, workflows, agents, and visual AI

Why I'm Here: I'm actively taking on consulting projects to build credibility and refine my approach to AI product strategy. Within 6-12 months, I'll transition to a full-time AI Product Manager or AI Strategy Lead role with a company building the future of enterprise AI.

What I'm Looking For:

- Consulting clients: Saudi businesses ready to deploy AI for competitive advantage
- Strategic

MBC GROUP

Senior IT | Radio Studio Engineer

Riyadh, Saudi Arabia

I design and deploy end-to-end studio environments—integrating infrastructure, automation, and cloud technologies to deliver seamless, high-quality broadcasting.

- Expertise: Studio Integration, Broadcast Engineering, Audio Processing,
Cloud (SaaS/IaaS/PaaS), Automation, Virtual Streaming, VM & Database
Management

Radio Studio Engineer

Jeddah

Page 2 of 5

Enhanced sound quality using advanced DSP and noise reduction, while ensuring studio stability and uptime. Built and supported core IT systems including network architecture (LAN/VLAN), IP-based audio routing, servers (VMs), NAS/SAN storage, and SQL databases.

Optimized workflows through monitoring, troubleshooting, and preventive maintenance—while introducing early automation and virtualization to create scalable, future-ready broadcast environments.

AI Automation

AI SOLUTIONS CONSULTANT (2025 - Present)

February 2025 - Present (1 year 4 months)

Riyadh, Saudi Arabia

AI Solutions Consultant helping Saudi businesses design and deploy production-ready AI systems that drive measurable growth.

I specialize in automation, voice AI, and growth infrastructure—combining strategy with hands-on execution to reduce costs, increase efficiency, and scale operations.

SELECTED CLIENT WORK:

Healthcare — Built "Layla," an Arabic AI voice receptionist for a Saudi dental clinic. Handles 24/7 bookings in Saudi dialect. 60%+ cost reduction, zero wait times, 100% accurate data capture.

Published case study available on my profile.

Stack: Vapi AI, n8n, Airtable, Twilio

E-commerce — Architected 90-day growth plan for a Saudi fitness retailer combining Meta ads + AI content automation. Pipeline converts 1 video into 15 pieces of weekly content—fully automated. Projected 180% revenue lift over 90 days.

Stack: n8n, Claude API, Whisper, Meta Ads, Opus Clip

Sales & Operations — Designed AI agents for lead management, onboarding, and proposal generation. Up to 80% time saved per workflow.

Stack: n8n, Claude Code, OpenAI

CORE EXPERTISE:

- Voice AI systems (Arabic-native conversational agents)

- End-to-end automation pipelines (1 input → multi-channel output)
- AI-powered growth strategy (paid + organic + content)
- Multi-tool orchestration (Claude Code, n8n, Vapi, Meta APIs)
- Saudi market expertise + Vision 2030 alignment

Recently completed Gen AI Bootcamp covering prompt engineering, agent swarms, workflows, vibe coding, and visual AI.

Focused on real ROI—not hype.

OPEN TO:

- Consulting projects with Saudi mid-market businesses
- Strategic partnerships with AI developers and agencies
- Full-time AI Product Manager / AI Strategy Lead roles (6-12 month horizon)

Let's talk → DM me on LinkedIn or WhatsApp.

Creative Edge

IT | Studio Support Associate

April 2010 - August 2013 (3 years 5 months)

Jeddah

Driving seamless broadcast operations by combining IT infrastructure with studio engineering.

Led a 3-member technical team across IT & broadcast operations

Configured, deployed & administered end-to-end radio systems

Managed DB servers for broadcast automation & IT systems

Designed & maintained studio network architecture (LAN/VLAN, IP routing)

Handled procurement, inventory tracking & budgeting

Implemented & tested Cisco switches, firewalls (Cisco, Cyberoam, SonicWall) & routers

Planned and executed technical upgrades with minimal downtime

Supported MCR operations & traffic systems for smooth on-air flow

Technical Highlights:

Radio Systems: Klotz Mixer, Omnia Processor, Comrex, FMB80 RDS

Audio Production: Adobe Audition, Cubase, Pro Tools, Logic Pro, Ableton Live

IT Stack: Server management, virtualization basics, storage systems, network security

Broadcast Ops: Live transmission, studio setup, troubleshooting & maintenance

Built a strong foundation in blending broadcast engineering with IT—ensuring reliable, high-quality, and scalable radio operations.

SIG Combibloc

IT Support Technician

January 2009 - February 2010 (1 year 2 months)

Jeddah

SIG Combibloc focuses on aseptic packaging and is a global innovator in liquid food & beverage packaging, delivering full-scale systems across 65+ countries.

During my time here, I built a strong IT foundation through hands-on training and real-world support environments.

Configured and supported Windows & macOS systems

Diagnosed technical issues and delivered effective end-user support

Contributed to support and development projects across IT functions

Monitored network access and ensured system security

Provided support for IT hardware, software, and network infrastructure

Managed email systems and maintained antivirus/security protocols

Gained practical experience in IT support, troubleshooting, and system administration—building the core skills that shaped my technical career.
